The next big change came in 1967 when the venerable 383-inch big-block V8 became available in the A-body line, thanks in no small part to famous Mopar performance dealer \"Mr. Norm\" building a prototype and showing it off to the factory boys in Detroit. Before the '67 model year was out, the 383 was a factory-offered option.

After all, he could have held onto the 1967 Dodge Charger his father had bought for him if only he'd kept his plans to himself. But no. "My dad started hearing, 'You know, if I put some big, fat tires on the back, soup up the motor a little bit, put a loud exhaust on it...'" and my dad kept hearing this, and he said, 'Hmm, not happening.'

### 1967 Dodge Charger | Hemmings

1967 Dodge Charger, Coronet RT steering wheel center, Oshawa / Durham Region 29/10/2020 Steering wheel center (horn button) for 1967 Dodge. This was from a Charger but would also be correct for Coronet and R/T. Part # PT-2852 477 46357A.

### 1967 Dodge Charger | Kijiji - Buy, Sell & Save with Canada ...

Installing the a/c and electric fan for the Charger. Ben has installed the engine, painted the engine cover and rebuilt the side cover. It is an honor to have such a rare classic car, such as this 1967 Dodge Charger in our shop. Only about 15,000 Chargers were made in '67 and not near that amount has survived.

### 1967 Dodge Charger - Precision Car Restoration

THIS 1967 DODGE CHARGER IS LOCATED IN: MEMPHIS, TN The Dodge Charger (B-body) is a mid-size automobile that was produced by Dodge from 1966 to 1978, and was based on the Chrysler B platform.

The B-body accounted for a wide range of Chrysler Corporation muscle cars of the sixties and seventies, including the Charger, Road Runner, Super Bee, Satellite, GTX, and Coronet R/T. These cars brought a great deal of character to the muscle car scene and continue to be extremely popular today, particularly with Mopar fans, some of the most rabid car enthusiasts there are. As an Original series title, this book will detail the correct parts, finishes, options, and trim pieces for all the b-body cars of this era. The wide variety of engine options, from Hemi to Wedge to Ram, will be covered in detail, as will all the special editions that featured wild colors and unique bodywork--elements that were crucial to the mystique of these cars. The book will be filled with high-quality, detailed photos of cars that are either excellent originals or very accurate restorations. About the Author Jim Schild is the publisher of The Auto Review and is the author of eight automotive books, including four for Motorbooks International. He began his life-long enthusiasm for Chrysler products in 1965 when he first worked at the St. Louis Chrysler Assembly Plant and continued into later involvement with drag racing. Schild lives in Columbia, Illinois and is a member of fifteen local and national collector car organizations, including the Society of Automotive Historians.

The Chrysler B-Bodies from 1966 to 1970 are the most-restored cars in the franchise's storied history. Popular models among them include the Charger, Coronet, GTX, Road Runner, and Super Bee. Restoring a Mopar B-Body is easier than ever with numerous of available aftermarket parts suppliers.

This book offers an in-depth resource for restoring a Mopar B-Body. Step-by-step processes walk you through the tasks of metal repair, suspension rebuild, driveline verification, interior restoration, and more. All components are addressed, creating the most complete resource in the marketplace. With multiple step-by-step procedures and more than 400 color photographs, this is the most-complete hands-on book ever written covering these coveted Chryslers. This will be your primary resource when it's time to tackle a full restoration or complete a simple repair on your prized Pentastar. You won't find a cheaper "part" that helps you more than Mopar B-Body Restoration 1966-1970.

The Art of Mopar: Chrysler, Dodge, and Plymouth Muscle Cars is the ultimate portrayal of history's ultimate muscle cars. This is the ultimate visual history of greatest muscle cars. The history of Chrysler Corporation is, in many ways, a history of a company floundering from one financial crisis to the next. While that has given shareholders fits for nearly a century, it has also motivated the Pentastar company to create some of the most outrageous, and collectible, cars ever built in the United States. From the moment Chrysler unleashed the Firepower hemi V-8 engine on the world for the 1951 model year, they had been cranking out the most powerful engines on the market. Because the company pioneered the use of lightweight unibody technology, it had the stiffest, lightest bodies in which to put those most powerful engines, and that is the basic muscle-car formula: add one powerful engine to one light car. When the muscle car era exploded onto the scene, Chrysler unleashed the mighty Mopar muscle cars, the Dodges and Plymouths that defined the era. Fabled nameplates like Charger, Road Runner, Super Bee, 'Cuda, and Challenger defined the era and rank among the most valuable collector cars ever produced by an American automaker.

Chrysler muscle car owners and restorers will value this guide that tells which "line" parts are interchangeable among the most popular models from the peak years of muscle car production. Among the models covered are the Charger, Road Runner, Barracuda, Challenger and Duster.

Author Steve Magnante is well known for his encyclopedia-like knowledge of automotive facts. The details he regularly puts forth, both on the pages of national magazines and as a contributing host and tech expert at the popular Barrett-Jackson Auctions on television, are the kinds of things muscle car fanatics love to hear. There are 1001 well-researched muscle car facts in this book that even some of the most esteemed experts would be surprised to learn. Covered are all the popular GM makes including Chevy, Buick, Oldsmobile and Pontiac, Ford and Mercury cars, Chrysler, Plymouth and Dodge cars, and even facts about AMC and Studebaker as well. Fans of these collectible cars will appreciate the technical and entertaining information shared on every page about all of the great American muscle cars. Whether you're an avid collector of multiple American muscle cars, the owner of one shining example, a trivia buff who wants to stump your friends, or just a fan of the big and powerful rear-wheel-drive rides of the 1960s and 1970s, this book is an informative and entertaining collection of facts from one of the industry's most beloved and respected sources.

Now 60 years old, your Slant Six could probably use some freshening up. Slant Six engine expert Doug Dutra has produced this volume to walk you through every aspect of disassembly, evaluation, rebuild, and reassembly in an easy-to-read, step-by-step format. The book also covers modifications, showing how to squeeze the most out of your engine. The year 1960 was an important one in auto manufacturing; it was the year all of the Big Three unveiled entrants in a new class of car called the compact. Chrysler's offering, the Plymouth Valiant, was paired with its redesigned 6-cylinder engine entrant, the Slant Six, known by its nickname the "leaning tower of power." This engine powered the Valiants when they swept the top seven positions in the newly christened compact race that precluded the Daytona 500. With its legacy intact, Chrysler's Slant Six powered Mopar automobiles for decades to come in three displacement offerings (170, 198, 225). With millions of Slant Six engines built over the 30-plus years that the engine was produced, it's always a good idea to have this book handy, as you never know when the next "leaning tower of power" will find its way into your garage! p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial}

Henry Neil "Soapy" Castles grew up in Charlotte, North Carolina, and became involved in its pioneering auto racing scene at an early age. Graduating from soapbox derby cars to midgets and sprints and finally to stock cars, he sometimes crashed, sometimes won, saw friends die horribly, and became a champion. Eventually he left the racetrack for Hollywood where he became a stuntman working alongside such stars as Rory Calhoun, Elvis Presley, Kenny Rogers, Richard Pryor and Andy Griffith. In the 1990s, groundwater contamination at Castle's truck repair business from an Exxon oil storage facility cost him an eye and most of his lungs. His decade-long class action lawsuit won him millions in compensation. Now in his mid-eighties, Castles is still going strong, procuring vehicles for movie and television projects.
