In this collection of essays, Watts displays the playfulness of thought and simplicity of language that has made him one of the most popular lecturers and authors on the spiritual traditions of the East. Watts draws on a variety of religious traditions and explores the limits of language in the face of spiritual truth.

Leading travel expert and USA Today columnist Christopher Elliott shares the smartest ways to travel in this tip-filled guide from National Geographic. Drawing on more than 20 years of experience as a consumer travel advocate, Elliott gives you the inside scoop on how to navigate the often perplexing world of travel, with detailed advice on: • Airlines • car rentals • cruises • hotels and alternative lodging • the TSA and security • staying connected • review websites • resolving complaints • vacation rentals • passports and visas • and much more Full of recommendations, real-life case histories, and the answers to the most common—and confounding—questions, this book is a must-read for anyone traveling anywhere.

This updated edition is an introduction appropriate for both the student and hobbyist to the theory and practice of electronics. It leads the reader through introductory understanding of the science underlying electronics, building basic circuits, learning the roles of the components, the application of digital theory and the possibilities for innovation by combining sensors, motors, and microcontrollers. Each chapter contains a brief lab to demonstrate the topic covered then moving on to the final projects that build a programmable robot with the Netduino or Arduino microcontroller and projects using the Rasperry Pi. The companion disc has videos of the labs, soldering skills, and code samples for programming of the robot. eBook Customers: Companion files are available for downloading with order number/proof of purchase by writing to the publisher at info@merclearning.com. Features: • Leads the reader through an introductory understanding of electronics with both simple labs and progressing to the construction of a microcontroller-driven robot using open source software and hardware and projects to run on a Rasperry Pi • Companion disc contains videos of labs, tutorials on soldering/ de-soldering, code for the microcontroller robot project, and figures from the text
