DMA (Designated Market Area) regions are the geographic areas in the United States in which local television viewing is measured by Nielsen. The DMA data are essential for any marketer, researcher, or organization seeking to utilize standardized geographic areas within their business. A DMA region is a group of counties that form an exclusive geographic area in which the home market television stations hold a dominance of total hours viewed.

Many devices can temporarily take control of the bus and perform data transfers to (and from) main memory or other devices. Because the device is doing the work without the help of the CPU, this type of data transfer is known as direct memory access(DMA). This chapter explains transfers between a device and memory only.
