species out of a single
parent species. As

when we discussed

species richness, it is

useful here to think of

uninhabited "islands"

of habitat, though in

this case, the islands

merely need to be

uninhabited by the

species in question.

Amazon.com: Speciation: Books

In each case, the radiation events are only a few million years old, making the high level of speciation particularly

remarkable. [8] [7] [6]

Several factors could be responsible for this diversity: the

availability of a multitude of niches probably favored specialization, as few
